2. **FURTHER ACTION**

If a demand for international preliminary examination is made, this opinion will be considered to be a written opinion of the International Preliminary Examining Authority ("IPEA") except that this does not apply where the applicant chooses an Authority other than this one to be the IPEA and the chosen IPEA has notified the International Bureau under Rule 66.1bis(b) that written opinions of this International Searching Authority will not be so considered.

If this opinion is, as provided above, considered to be a written opinion of the IPEA, the applicant is invited to submit to the IPEA a written reply together, where appropriate, with amendments, before the expiration of 3 months from the date of mailing of Form PCT/ISA/220 or before the expiration of 22 months from the priority date, whichever expires later.

For further options, see Form PCT/ISA/220.

Basis of this opinion

1. With regard to the language, this opinion has been established on the basis of the international application in the language in which it was filed, unless otherwise indicated under this item.  
☐ This opinion has been established on the basis of a translation from the original language into the following language  
\_\_\_\_\_, which is the language of a translation furnished for the purposes of international search (under Rule 12.3 and 23.1(b)).
2. With regard to any nucleotide and/or amino acid sequence disclosed in the international application and necessary to the claimed invention, this opinion has been established on the basis of:
  - a. type of material  
☐ a sequence listing  
☐ table(s) related to the sequence listing
  - b. format of material  
☐ in written format  
☐ in computer readable form
  - c. time of filing/furnishing  
☐ contained in the international application as filed.  
☐ filed together with the international application in computer readable form.  
☐ furnished subsequently to this Authority for the purposes of search.
3. ☐ In addition, in the case that more than one version or copy of a sequence listing and/or table(s) relating thereto has been filed or furnished, the required statements that the information in the subsequent or additional copies is identical to that in the application as filed or does not go beyond the application as filed, as appropriate, were furnished.

Document 8: JP 2003-312085 A (Canon Inc.), 06 November 2003

In regard to claims 1, 10-12, 15-23, 31-32, 52-59, 62-63, and 65-67

Claims 1, 10-12, 15-23, 31-32, 52-59, 62-63, and 65-67 do not appear to involve an inventive step based on documents 1-8 cited in the ISR.

Document 1 describes continuous sealing of sheets between thermoplastic film, cooling by a cooling device after sealing, and cutting the plastic film edge with a cutter. For document 1, continuous sealing of the material to be sealed as the recording medium between film sheets as in document 2 would be easy for a person skilled in the art.

Also, in document 1, setting the width to be cut with the cutter, installing a second pressurizing part as in document 3, setting the roll shape, using hard and soft rolls as in document 4, making exchange of the supply film possible as in document 5, making it possible to switch between a condition without pressurizing and a condition where pressurizing is possible, installing a cooling mechanism as in documents 6 and 7, and recovering from the roll with the lamination substrate facing to the inside as in document 8 would be easy for a person skilled in the art.
